

# R290 CANISTERS

NATURAL REFRIGERANT ADVANTAGE

## TRUE R290 CANISTERS

(14.1 oz. of R290)

### EASE OF USE

A simple solution for your R290 refrigeration system. This includes True manufactured equipment, or any manufacturer's R290 system.

### R290 HIGHEST PURITY

True's R290 is the only refrigerant acceptable for warranty work on True equipment and provides the most efficient performance lowering utility costs. It is also strongly recommended for use after the warranty period to provide years of trouble-free service.

### UL CLASSIFIED

The R290 refrigerant that matches the UL certification of your True unit. This refrigerant will provide longevity and safety under normal wear and tear and helps maintain the UL certification of your cabinet.

### FREE GROUND SHIPPING

Available in packs of 6, 12, and 24 canisters

# R290 CANISTERS

NATURAL REFRIGERANT ADVANTAGE

## TRUE REQUIRES UL CERTIFIED R290 REFRIGERANT FOR WARRANTY WORK

- True is now requiring the use of **UL** approved refrigerant only for any warranty refrigeration repairs on True equipment.
- True strongly recommends the use of **UL** approved refrigerant only for any non-warranty refrigeration repair on True equipment.

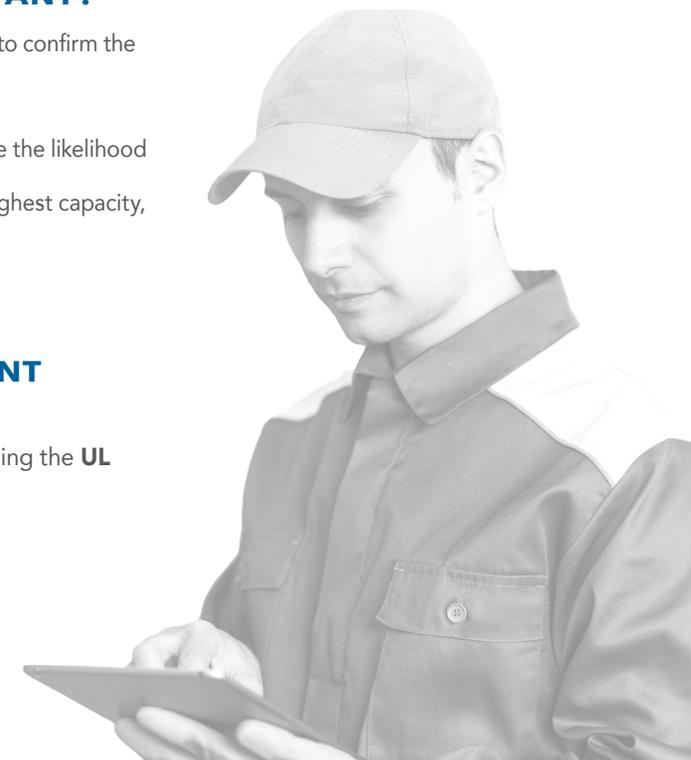

## WHY IS THE USE OF UL APPROVED REFRIGERANT SO IMPORTANT?

- Using a **UL** certified refrigerant means that the supplier of the refrigerant undergoes regular testing to confirm the purity level of the refrigerant is a minimum of 99.5% pure.
- Using **UL** approved refrigerant assures the highest purity of refrigerant is being used. This will reduce the likelihood of premature refrigeration component failures and allow the refrigeration system to function at its highest capacity, which is important for operation and energy-efficiency.

## HOW COULD USING A NON-UL APPROVED R290 REFRIGERANT AFFECT MY CERTIFICATION?

- The use of any non-**UL** approved refrigerant could lead to the equipment being worked on having the **UL** Certification voided.
